
Janowice Wielkie

is a place picturesquely situated at the foot of Rudawy Janowickie (a mountain range which is a part of the Karkonosze Mountains), 15 km from Jelenia Góra, the capital city of this part of the region.

The first references about Janowice date back to 1367, which makes it one of the oldest settlements in Karkonosze.

The CARE HOME situated here is located in the palatial and manorial buildings built in 1608-1609 by Daniel von Schaffgotsch.

Between years 1765-1945 the estate with the antique park of 10 ha used to belong to the aristocratic family of Counts Graf von Wernigerode.

Since 1952 the palace has been converted into the Care Home for Intellectually Handicapped Men.

Currently it is resided by 91 residents whom we provide with the 24-hour maintenance, healthcare and wide range of rehabilitation activities such as: activity therapy, "experience of the world" room, the gym, and the computer room.

In the park adjacent to our Home you can not only stroll, but also organize feasts, barbecues, bonfires (in the specially separated and prepared area), or - in winter season – the attractive sledge runs.

The location of Home (the immediate neighbourhood of the mountains) encourages also the strolls in the forest and in the mountains.

We have two 9-seated coaches at the residents' disposal.

Numerous cultural, recreational and sports events as well as excursions make the Home especially attractive and make us distinguishable from the group of a similar profile institutions.

Thanks to friendly atmosphere as well as friendly attitude of the employees our residents have found this place a genuine family home. For the relatives and visitors visiting them the accommodation may be provided in the guest-rooms made available at the Home.

Everyone from Poland and abroad who would like to visit our HOME or perhaps help achieve even a higher standard is cordially welcome and invited.
